Day – 15

Task – Perform feature engineering and baseline regression.

Day - Wednesday

Date – 11th March 2026

Time – 7:00 AM – 10:00 AM

Dataset – House Prices – Advanced Regression

Source – The dataset was downloaded from Kaggle.

- Downloaded the dataset and imported into Jupyter lite for cleaning.
- Dataset has **157 Rows** and **9 Columns**.
- Imported necessary libraries.
- Performed basic operations to get data insights.
- Analysed outliers using scatter plot.
- Used train, test, split to slit the dataset.
- Trained regression model.
- By using prediction model predicted the house prices.
- I have applied what I understood but I will learn more about it and will apply it correctly.
