Day – 18

Task –Handle Imbalanced dataset and build fraud detection model.

Day - Wednesday

Date – 18th March 2026

Time – 7:00 AM – 10:00 AM

Dataset –Credit Card Fraud Detection.

Source – The dataset was downloaded from Kaggle.

- Downloaded the dataset and imported into Jupiter lite for cleaning.
- Dataset has **10000 Rows** and **10 Columns**.
- Imported necessary libraries.
- Performed basic operations to get data insights.
- While handling imbalanced data got some import errors as Jupiter environment doesn't support to the library, I used Google Collab to perform the task.
- While performing task into it have got some another error as time bound, I was unable to resolve the error in Time.
