

**Day – 25**  
**Task – Deep Dive EDA and Feature Engineering.**

**Day** - Friday

**Date** – 24th April 2026

**Time** – 7:00 AM – 10:00 AM

**Dataset** – Housing Prices Dataset.

**Source** – The dataset was downloaded from Kaggle.

**Why this dataset** - I chose the Housing Prices Dataset because it is simple and easy to understand. To perform EDA and feature engineering.

- Downloaded the dataset and imported into **Jupyter lite** for cleaning.
- The dataset has **545 rows** and **13 columns**.
- Imported necessary libraries and dataset using **function**.
- Performed basic operations to get data insights using function.
- Changed datatype of column where necessary.
- Performed **univariate analysis** and **bivariate analysis** using histogram and scatter plot respectively.
- Performed feature engineering.
- Plot correlation heatmap.
- Saved clean dataset.
