

Day – 27

Task – Baseline Classification (Churn Prediction)

Day - Sunday

Date – 26th April 2026

Time – 7:00 AM – 10:00 AM

Dataset – Telecom_Churn_Dataset.

Source – The dataset was downloaded from Kaggle.

Why this dataset - I chose this dataset because it is easy and helps predict if a customer will leave or stay.

- Downloaded the dataset and imported into **Jupyter lite** for cleaning.
- The dataset has **7043 rows** and **21 columns**.
- Imported necessary libraries and dataset using **function**.
- Performed basic operations to get data insights using function.
- Changed datatype of column where necessary.
- Converted target variables.
- Encoded categorical column.
- Selected features and trained model.
- Predicted accuracy score.
- Saved clean dataset.
