

Day – 25

Task – Regression Modeling (CLV Prediction).

Day - Friday

Date – 24th April 2026

Time – 7:00 AM – 10:00 AM

Dataset – Housing Prices Dataset.

Source – The dataset was downloaded from Kaggle.

Why this dataset -I chose the Housing Prices Dataset because it is simple and easy to understand. To perform EDA and feature engineering.

- Downloaded the dataset and imported into Jupiter lite for cleaning.
- The dataset has 545 rows and 13 columns.
- Imported necessary libraries and dataset using function.
- Performed basic operations to get data insights using function.
- Changed datatype of column where necessary.
- Performed univariate analysis and bivariate analysis using histogram and scatter plot respectively.
- Performed feature engineering.
- Plot correlation heatmap.
- Saved clean dataset.
